New DECRA Starter Clip with Drip Edge & Short Course Clip

Based on marketing input with the launch of DECRA Shingle XD, DECRA Roofing Systems will now offer a universal Starter Clip with Drip Edge and universal Short Course Clip. These new pieces incorporate an enhanced design for use both with DECRA Shake XD and DECRA Shingle XD.

Both of the new accessory pieces will be 6'6". The Starter Clip will replace the XD Starter Clip and the Short Course Clip will replace the XD Short Course Clip.

The Starter Clip with Drip Edge and Short Course Clip can also be used with DECRA Shingle, however we will continue to offer the Shingle Starter Clip with Drip Edge and the Shingle Short Course Clip.

The DECRA Starter Clip with Drip Edge & DECRA Short Course Clip design is not compatible and cannot be mixed with existing XD or Shingle Starter Clip and XD or Shingle Short Course.
