

Product Enhancement Notice

DECRA has recently designed a new rake channel called **XD Rake Channel**, which will replace both the Shake XD and Shingle XD Rake Channels. The transition to the new **XD Rake Channel** will be implemented around August 1, 2017. The transition could affect inventories and installations if special care is not taken.

All FULL PALLETS will be marked as DO NOT MIX.

The new **XD Rake Channel** design has a height of 1-1/4" to accommodate both the Shake XD and Shingle XD Panels.

Note: Special care must be taken not to mix inventories of the new XD Rake Channel and the old XD Rake Channels. Because the Rake Channel height is different the products will not match up on an installation.

If you have any questions or concerns about these changes please contact your local DECRA Regional Manager.
