

Reduce Energy Costs with a Cool Roof

The roof of a building is exposed to the sun more than any other part of the structure, making the roofing material a critical factor when it comes to energy efficiency.

Engineered to reflect heat from the sun, DECRA's line of Cool Roof Colors are certified by the [Cool Roof Rating Council \(CRRC\)](#) to have high solar reflectance and thermal emittance properties that reduce energy costs by lowering roof temperatures.

DECRA Metal Roofing Cool Roof Colors

Available on all DECRA Metal Roofing profiles:

ROYAL OAK

MIST GREY

SPANISH CLAY

More Than Just Energy Savings with DECRA Metal Roofing

Energy savings are just a fraction of the ongoing returns you can look forward to when investing in a DECRA Metal Roof. Other benefits may include:

- ▶ Increasing your home's resale value by up to 6%.
- ▶ Recouping up to 85.9% of the initial cost of the metal roof.
- ▶ Getting insurance premium discounts.
